

## New development from FALCON!

Outstanding performance  
with **Falcon** heated trim less slitter!  
**Clean cut - Long service time**  
**Dust free operating - Excellent roll quality**

**Electrically heated blade holders for slitting or trimming of blown film! A very cost effective and alternative solution for solving problems created from dust or deposits in blown film. This is an excellent solution for producers of film for food packaging, film for medical use or other sensible products.**

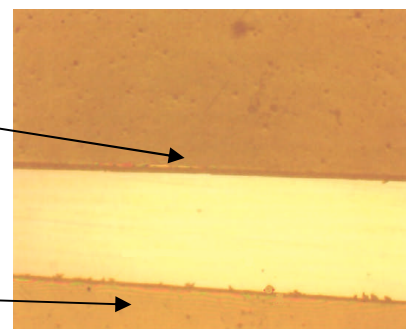

### Outstanding advantages:

- The blade holders are made from aluminum and have a ceramic Kepla-coating ensuring long service life, low weight and low inertia for the units.
- Falcon knife holders are equipped with fitting for air hose connection and have air nozzles acting as 'cushion' to keep the film floating smoothly in the film.
- Reduction valve is not necessary.
- Low friction bearings and ceramic Kepla-coating on the guiding wheels ensuring perfect slitting.
- A set of slitters are identical and inter-exchangeable, and easy to install.

Example,  
**heated cutting**

Example,  
**cold cutting**
